CERTIFIED
BANK-READY
30 JUN 2026

01 — IN PLAIN WORDS

What this means for you

Your business scores **84 out of 100 — Excellent**, and it is now **certified bank-ready**. In a lender's eyes, Sri Sai is a strong file: the numbers hold up, the bank conduct is clean, and the proprietor's credit record is on file.

Two things carry this score. First, your **banking discipline is strong (90.8/100)** — money is routed through the account and the conduct reads well. Second, your **GST filing is consistent (100/100)** — returns are in, month after month. With the proprietor's **CIBIL of 780** now recorded, the file moved from “promising” to genuinely **bankable**, which is what unlocks a mainstream bank at a sensible rate rather than an NBFC.

The honest watch-points are **leverage and the working-capital cycle**. The business carries more outside borrowing relative to its own net worth than a bank likes to see, and a great deal of cash is locked up in customer dues — **₹2.49 Cr of receivables**, the single biggest drag on the cycle. Neither blocks a loan today; both are exactly where a small effort lifts you from a good file to a great one.

WHAT'S WORKING FOR YOU

- **Clean bank conduct** — turnover is routed through the account; banking discipline scores 90.8.
- **Spotless GST record** — consistent monthly filing; GST consistency at 100.
- **Comfortable liquidity** — current ratio 2.44 against a 1.33 norm; short-term dues are well covered.
- **Credit record on file** — proprietor CIBIL 780, which certifies the file as bank-ready.

WHERE TO FOCUS NEXT

- **Leverage is high** — outside liabilities are 3.23× net worth (norm ≤3.00). Build net worth to ease it.
- **Cash is locked in receivables** — 371 debtor-days dominate a 540-day cycle. Tighten collections.
- **Thin margins** — net profit is ~1.3% of turnover; worth protecting as you grow.
- **No term-loan data** — add EMI details so debt-service capacity (DSCR) can be assessed.

HEALTH SCORE	BANK-READINESS	INDICATIVE RATE	DATA COMPLETENESS

Excellent · certified	Bank-verified, CIBIL on file	PSU bank, working capital	All score inputs evidenced

02 — THE BREAKDOWN

Credit-Readiness Scorecard

The 84 is a weighted blend of eight components a banker assesses. Each is scored 0–100 against a target of 80 (the bank-ready line). The bar shows where each sits; the marker is the target.

COMPONENT	WEIGHT	SCORE	AGAINST TARGET (80)	GAP	STATUS
Banking discipline	25%	90.8		+10.8	ON TRACK
Liquidity ratios	15%	76.0		−4.0	NEAR
GST consistency	15%	100.0		+20.0	ON TRACK
Leverage quality	10%	50.0		−30.0	BELOW
Profitability	10%	80.0		0.0	ON TRACK
Compliance discipline	10%	90.0		+10.0	ON TRACK
Documentation readiness	10%	80.0		0.0	ON TRACK
Repayment behavior	5%	100.0		+20.0	ON TRACK
Composite Health	**100%**	**84.0**		**+4.0**	CERTIFIED

Read it like this: six of eight components clear the bank-ready line, and the two that don't — **leverage** (50) and **liquidity** (76, just shy) — are the same two themes the summary flagged. They drag, but the heavily-weighted components (banking 25%, GST 15%) carry the composite comfortably over 80.

03 — THE BANKER'S LENS

Banker Ratios

The five ratios a credit officer checks first, computed from your FY 2024–25 audited accounts, each against its lending norm — with a plain reading of what it signals.

RATIO	VALUE	NORM	VERDICT
Current ratio	2.44	≥ 1.33	PASS
Short-term assets are 2.4× short-term dues — comfortable headroom to meet obligations as they fall due.			
Interest coverage (ICR)	2.02	≥ 1.50	PASS
Operating profit covers interest 2.0× over — the business services its current interest burden with room to spare.			
TOL / TNW	3.23	≤ 3.00	STRESSED
Total outside liabilities are 3.23× the proprietor's net worth, just over the 3.00 comfort line — leverage is the file's main soft spot. Building net worth (retained profit or capital infusion) brings this inside norm.			
WC cycle (days)	540	≤ 600*	STRETCHED
Cash is tied up for 540 days from buying materials to collecting payment. Within the sector-aware band for works-contract (≤600), but near the edge — driven by slow receivables.			
DSCR	—	≥ 1.50	NO DATA
Debt-service coverage needs term-loan EMI and interest figures, not yet on record. Required before assessing term-loan eligibility — see next steps.			

WORKING-CAPITAL CYCLE — WHERE THE 540 DAYS COME FROM

371	+	236	−	67	=	540
DEBTOR DAYS		INVENTORY		CREDITOR		CYCLE

Receivables of **₹2.49 Cr** sit behind the 371 debtor-days — the dominant strain on the cycle. Every 30 days shaved off collections frees roughly **₹20 L** of cash and improves both this cycle and your cash runway.

04 — THE NUMBERS BEHIND IT

Financial Snapshot

Key figures from the FY 2024–25 audited statement (A Rudra & Co), and the rolling GST-declared revenue for the current year.

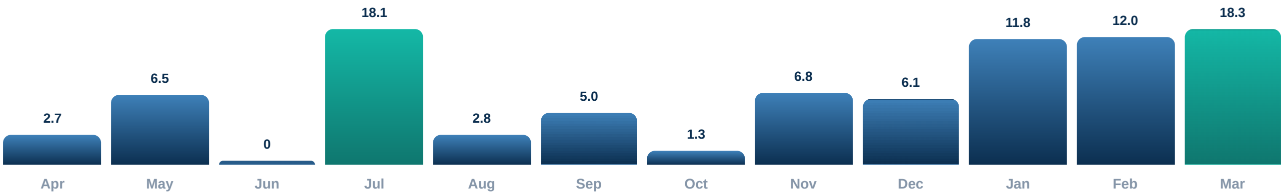
PROFIT & LOSS	FY 2024–25
Turnover (sales)	**₹ 2,44,44,909**
Purchases	**₹ 1,17,04,435**
Gross profit	**₹ 52,82,284**
Operating profit (EBIT)	**₹ 6,24,357**
Interest	**₹ 3,09,769**
Depreciation	**₹ 8,99,573**
Net profit after tax	**₹ 3,14,588**

Gross margin **21.6%** · net margin **1.3%** — healthy at the gross line, thin after costs.

BALANCE SHEET	AS AT 31 MAR 2025
Current assets	**₹ 3,74,65,525**
of which — sundry debtors	**₹ 2,48,56,947**
of which — inventory	**₹ 75,65,800**
Current liabilities	**₹ 1,53,39,231**
Total outside liabilities	**₹ 3,33,81,766**
Tangible net worth	**₹ 1,03,23,902**
Borrowings (secured + unsecured)	**₹ 1,80,42,535**

Receivables alone exceed a full year of turnover — the working-capital story in one line.

MONTHLY GST-DECLARED REVENUE — FY 2025–26 (₹ LAKH)



FY 2025–26 GST-declared revenue totals **₹0.91 Cr** across 12 months — a quieter, project-driven year than the FY 2024–25 audited turnover of ₹2.44 Cr. Revenue is lumpy (Jul and Mar peaks), typical of works-contract billing tied to project milestones.

05 — THE RECOMMENDATION

Where you can borrow — and how to do better

INDICATIVE LENDER TIER

PSU Bank · 9.0–10.5% p.a.

Working-capital facility · bank-verified conduct · proprietor CIBIL 780 on file

BASIS	CERTIFICATION	BEST-FIT PRODUCT
FY24–25 audited + 12-month GST + bank evidence	**Bank-ready (not provisional)**	**CC / OD against receivables**

The file qualifies for a mainstream bank today. These four moves lift it from a good file to a strong one — and would push the score toward the low-90s.

1. **Tighten collections on your largest debtors**
371 debtor-days drive the 540-day cycle. Pulling collections in frees cash and lifts liquidity. **Impact: shorter WC cycle, better cash runway, higher liquidity score.**

2. **Build net worth to ease leverage**
TOL/TNW at 3.23 is just over norm. Retaining profit or a small capital infusion brings it inside 3.00. **Impact: moves leverage quality off 50, the lowest-scoring component.**

3. **Record your loan EMI & interest split**
DSCR currently reads “no data” for want of term-loan figures. Adding them unlocks term-loan eligibility assessment. **Impact: completes the lending picture for any term borrowing.**

4. **Protect the margin as you scale**
Net margin is ~1.3%; gross margin is healthy at 21.6%, so the gap is in overheads and finance cost. **Impact: a stronger profitability base and a more resilient file.**

About this report. Prepared by MFOS from the client's FY 2024–25 audited financials (A Rudra & Co), 12 months of GSTR-3B filings, bank-statement evidence, and a consumer credit-bureau pull (CIBIL 780, dated 30 Jun 2026) for the proprietor. Scores are computed by the MFOS credit-readiness engine and are an advisory indication of bank-readiness, not a sanction or a guarantee of credit. Lending decisions rest with the lender. Rate ranges are indicative of prevailing PSU working-capital pricing for comparable files and are not an offer. Figures are as reported in the underlying documents. · Generated 30 June 2026.
